

## **HOT-DIP GALVANISING, YOUR INSURANCE POLICY AGAINST CORROSION**

### **1 HOT-DIP GALVANISING, THAT IS MORE THAN 150 YEARS OF STABILITY**

Nothing offers more certainty than "natural protection". For over 150 years, this natural marriage between steel and zinc has proven that there is no better way to protect steel against corrosion. In this way, Thielco ensures a sustainable and stable result.

### **2 WHAT YOU SEE IS WHAT YOU GET**

Nothing offers more certainty than a "fair system". With hot-dip galvanising you can immediately see whether it has been carried out properly or badly, there are no hidden defects. Honesty is the best policy.

### **3 CLASS E / CLASS F & STANDARDISED DIALOGUE**

Nothing offers more certainty than "meeting expectations". A good dialogue between client, contractor and galvanising company is therefore crucial. Among other things, the choice between Class E (aesthetic) or Class F (functional) stimulates communication between the various parties. In this way, Thielco can better coordinate expectations and end results. This offers certainty instead of surprises afterwards.

### **4 GUARANTEE**

Nothing offers more certainty than "30-year warranty". Thielco offers a 30-year guarantee on galvanising, depending on the product and application.

### **5 RICH TRADITION**

Nothing offers more certainty than a "rich tradition". Just like Thielco, almost all galvanising plants in the Benelux are originally family businesses. Thielco knows its customers and knows what they want for many generations.

### **6 IMPROVEMENT PROCESS LOGISTICS AND QUALITY CONTROL**

Nothing offers more certainty than the "willingness to continuously improve". Thielco is committed to aligning logistics and quality control even better with the changing wishes and requirements of its customers.
